Subject: 17-mile LPRSA Draft RI Report Submission
20150218 17-mi RI Report Transmittal Ltr w-SSHHRA attach to EPA.pdf

Stephanie:

The draft 17-mile RI Report prepared by the CPG and its technical consultants (Anchor QEA, AECOM, Woodward, and Moffatt and Nichol) has been uploaded to EPA's LPR Sharepoint.

- Attached is CPG's transmittal letter and an accompanying attachment containing CPG's August 2014 Site-Specific Human Health Risk Assessment prepared by AECOM.
- Section 7 - Summary of Modeling Results for the Lower Passaic River Study Area will be included in a separate submission in the next several weeks. I will note that EPA has been provided with the CPG's latest modeling code and calibration results for the HST (August 2014), CFT (January 2015) and bioaccumulation modeling (February 2015). The CPG looks forward to working with EPA and finalizing the modeling for the 17-mile LPRSA RI/FS in the near future.
- Appendices B-E are the RI analytical data, data characterization reports, data validation reports, risk assessments previously submitted to EPA and are not included again in this submission.

Please contact Bill Potter or me with any questions.

Thank you.
